

# COBRA 34,000 L DIESEL BOWSER

## Specifications

Manufactured on-site at our factory in Johannesburg, our 34,000 litre diesel bowzers are the fast movers in our range.

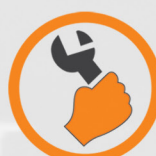

- **34,000 litre** diesel tank with electronic level sensor and digital readout, effective internal baffling, and air breather
- Hydraulic motor driven diesel vane pump that delivers at **±550 l/min**
- Rear bumper to house meter, filtration unit, hydraulic motor driven diesel pump unit, and dispensing hose reels
- Accurate L/C10 meter, suitable for custody transfer, with air eliminator
- Donaldson filter arrangement to handle **550l/min**, with kidney filtration and water coalescing filter
- Fast Fill receiver point with Fast Fill pressureless and auto shut-off system rated to **1000l/min**
- High volume hydraulic dispensing hose reel with standard 1 ¼" hose and 2" Fast Fill nozzle for dispensing at **±550l/min**, alternatively at flow rates per client specification
- Low volume dispensing hose reel with standard ¾" hose and kerb side nozzle dispensing at **±120l/min**, alternatively at flow rates per client specification
- Hose reels mounted in lockable cabinet
- All piping mounted in a secure, enclosed position, with no unnecessary joints or open valves, to enhance the safety factor against diesel losses
- Unit sandblasted and painted with 2-coat epoxy paint system in **CAT** yellow
