

COMPANY PROFILE

Forming part of the Cobra group of companies, Cobra Projects is a family-founded company boasting over 33 years' experience in the mining and lubrication industries. Cultivated from the ground up, we have developed into a substantial contributor to the mining industry, manufacturing mining support equipment for both surface and underground use.

Each Cobra unit is designed to unique customer specifications and built in compliance with strict quality standards. Our solid understanding of the hard mine working environments, coupled with our technical expertise, hands-on experience and professional know-how, afford us a unique insight in terms of innovation and design. From articulated fuel and lube trucks, to special vehicles and low loader trailers, we offer an extensive range of mining support vehicles.

Cobra units are designed for both on- and off- highway, ADT and RDT, chassis cabs and are adaptable to fit a range of Belaz, Bell, CAT, Hitachi, Komatsu, Liebherr and Volvo models. Our Lite units are suitable for 4x2, 4x4, 6x4, 6x6, 8x4 and 8x8 chassis cabs and are adaptable to fit various Astra, DAF, FUSO, Hino, Howo, Isuzu, Iveco, Kamaz, MAN, Mercedes, Renault, Scania, UD Trucks, and Volvo models.

Our products improve the OEE of key mining equipment through industry-leading fluid transfer rates and cleanliness of diesel, oil, and grease. Thorough commissioning and dependable after sales service are key contributors to maintaining the ongoing durability of our final product.

Our versatile design team is highly committed to continuous improvement and dedicated to ensuring that Cobra Projects remains ahead of design and industry trends. With customer excellence forming the baseline of our business philosophy, we strive to achieve a consistently high level of quality, and deliver an equally superior level of customer service.
